VENKATSAI MARAGONI

Technical Writer · Structured Authoring (DITA/XML) · AI-Assisted Documentation · Docs-as-Code

Bengaluru, India | +91 83095 44500 | maragonivenkatsai@gmail.com | github.com/Venkat4real/Documentation-Portfolio

PROFILE

Technical Writer with 4+ years of experience creating user, maintenance, and service documentation in regulated and engineering-heavy domains: ASML semiconductor equipment (DITA/XML, CCMS) and a US healthcare SaaS product. Used generative AI tools with reusable prompt libraries to speed up drafting without losing accuracy, and built Docs-as-Code publishing pipelines with Git, GitHub Actions, and Vale. Skilled at translating complex hardware and software systems for technical and non-technical audiences.

EXPERIENCE

Grasko Solutions **Bengaluru**

Technical Writer *Aug 2024 – Present*

- Created and maintained user guides for a cloud-based US healthcare SaaS product (electronic health records for clinical agencies), improving clarity and reducing support queries.
- Used AI-assisted tools to draft, restructure, and summarize content, accelerating delivery of multiple product user guides; fact-checked all AI output for accuracy and hallucinations and validated it with SMEs before publication.
- Partnered with cross-functional engineering and product teams and subject matter experts (SMEs) to gather requirements for new features and workflows; tracked documentation work in Jira and collaborated in Confluence.

Capgemini (Client: ASML) **Bengaluru**

Technical Writer and Illustrator *May 2022 – Jun 2024*

- Authored assembly, maintenance, and service procedures for ASML DUV lithography systems supporting semiconductor manufacturing operations.
- Developed structured content in DITA/XML using Arbortext and SDL Tridion CCMS, designing topics for reuse and consistent terminology across procedures.
- Created technical illustrations and diagrams for procedures using engineering data from Teamcenter and NX.
- Peer-reviewed procedures for technical accuracy, quality, and compliance with client documentation standards; recognized by the client for consistent delivery of high-quality structured documentation.

PROJECTS & OPEN SOURCE

- **Documentation portfolio (Docs-as-Code):** version-controlled Jekyll site on GitHub Pages with a GitHub Actions CI/CD publishing pipeline, Vale style and grammar checks, and automated release notes.
- **IBM Qiskit / IBM Quantum:** open-source documentation contributions through GitHub pull requests, improving clarity and formatting.

SKILLS

Structured authoring & CCMS: DITA, XML, Oxygen XML Editor, Arbortext, SDL Tridion, Document360

AI-assisted documentation: Claude, prompt libraries, local LLMs (Ollama), fact-checking and hallucination review, human-in-the-loop review

Docs-as-Code: Git (version control), GitHub, GitHub Actions, Markdown, Jekyll, HTML

Engineering & graphics: Teamcenter, NX, Snagit

Collaboration: Jira, Confluence

EDUCATION

B.Tech, Aerospace Engineering — Lovely Professional University, Punjab **2021**
